Types of Stainless Steel

304

Grade 304 is the most widely used stainless steel with good resistance to atmospheric corrosion. This grade has excellent workability, weldability and impact strength. It is sometimes known as 18/8 stainless steel, since it contains 18% chromium and 8% nickel. It is suitable for use in a variety of instruments, in fact it is the most common stainless steel, and about 60% of all stainless steel used in the world is grade 304.

302

Grade 302 is an austenitic chromium-nickel stainless steel. Type 302 is a higher carbon, earlier version of Type 304 stainless steel, and many 302 applications have switched to Type 304 with the improvements in melting technology. Type 302 is non-magnetic.

316L

Grade 316L is an austenitic chromium-nickel steel with low carbon content. It has good corrosion resistance to most chemicals and a high creep strength at elevated temperatures. The low carbon content reduces the possibility of corrosion in medical instruments.

410

Grade 410 is the basic, general purpose martensitic stainless steel that is used for highly stressed parts and provides good corrosion resistance plus high strength and hardness. Alloy 410 contains a minimum of 11.5% chromium which is just sufficient enough to demonstrate corrosion resistance properties in mild atmospheres, steam, and many mild chemical environments. It is a general purpose grade that is often supplied in the hardened but still machineable condition for applications where high strength and moderate heat and corrosion resistance are required. Alloy 410 displays maximum corrosion resistance when it's been hardened, tempered, and then polished.

420

Grade 420 is a martensitic stainless steel that provides good corrosion resistance similar to 410 plus increased strength and hardness. It is magnetic in both the annealed and hardened conditions. Maximum corrosion resistance is attained only in the fully hardened condition.
APPLICATIONS
Surgical & Dental instruments.

440

Grade 440 stainless steels are high carbon steels, which attain the highest hardness, wear resistance and strength of all stainless steel grades after heat treatment.
Applications
Grade 440 stainless steels find applications in the following:
Chisels
Medical & Surgical equipments.

SuperCut Scissors

Your everyday black handle scissors

- Microtome Edge
 - Razor sharp cutting edge facilitates gentle cutting with minimal force
- Wavecut Blade
 - Prevents tissue from slipping out during the cutting process

For more information about SuperCut Scissors see brochure number DOC821.

Microtome Edge

Wavecut

Noir Supreme Cut Scissors

- **Noir**
The combination of the renowned Aesculap Tungsten Carbide technology with the Aesculap Noir coating results in an extremely high surface hardness and therefore high wear resistance in daily hospital use.
- **Microtome edge**
The extremely sharp cutting edge of the scissors blade facilitates gentle cutting of tissue with minimal use of force.
- **Wavecut prevents tissue from slipping out during the cutting process.**
- **The WB after the item number indicates the Noir scissors are the wavecut style, e.g. BC211WB.**

For more information about Noir Supreme Cut Scissors see our brochure number **DOC637**.

Aesculap features Needle Holders with Tungsten Carbide (TC) inserts. A smooth jaw and three different serration patterns are available, depending on the size of the suture needle.

We recommend carbide inserts as follows:

Jaw Surface	Suture Material
Smooth	9/0 - 11/0
0.2 mm pitch of serration	6/0 - 10/0
0.4 mm pitch of serration	4/0 - 6/0
0.5 mm pitch of serration	up to 3/0
